

PROGRAM:

1. HTML Form (index.html)

```
<!DOCTYPE html>
<html>
<head>
  <title>GET vs POST Demo</title>
</head>
<body>
  <h2>Enter Your Details</h2>

  <form action="MethodServlet" method="get">
    Name: <input type="text" name="name"><br><br>
    Email: <input type="email" name="email"><br><br>
    <input type="submit" value="Submit using GET">
  </form>

  <br>

  <form action="MethodServlet" method="post">
    Name: <input type="text" name="name"><br><br>
    Email: <input type="email" name="email"><br><br>
    <input type="submit" value="Submit using POST">
  </form>
</body>
</html>
```

2. Servlet Program (MethodServlet.java)

```
import java.io.*;
import javax.servlet.*;
import javax.servlet.annotation.WebServlet;
import javax.servlet.http.*;

@WebServlet("/MethodServlet")
public class MethodServlet extends HttpServlet {

    protected void doGet(HttpServletRequest request, HttpServletResponse response)
        throws ServletException, IOException {

        response.setContentType("text/html");
```

```
    PrintWriter out = response.getWriter();

    String name = request.getParameter("name");
    String email = request.getParameter("email");

    out.println("<h2>GET Method Used</h2>");
    out.println("Name: " + name + "<br>");
    out.println("Email: " + email);
}

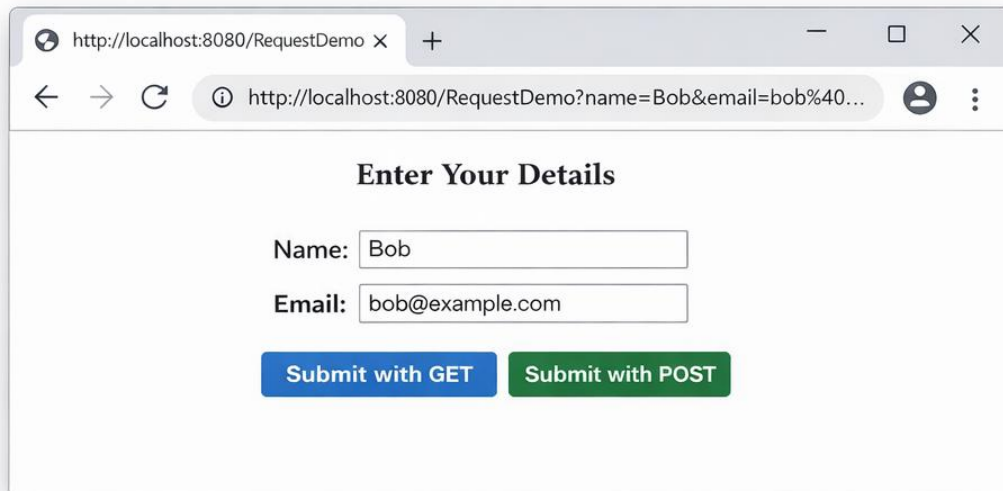

protected void doPost(HttpServletRequest request, HttpServletResponse response)
    throws ServletException, IOException {

    response.setContentType("text/html");
    PrintWriter out = response.getWriter();

    String name = request.getParameter("name");
    String email = request.getParameter("email");

    out.println("<h2>POST Method Used</h2>");
    out.println("Name: " + name + "<br>");
    out.println("Email: " + email);
}
}
```

Input Form

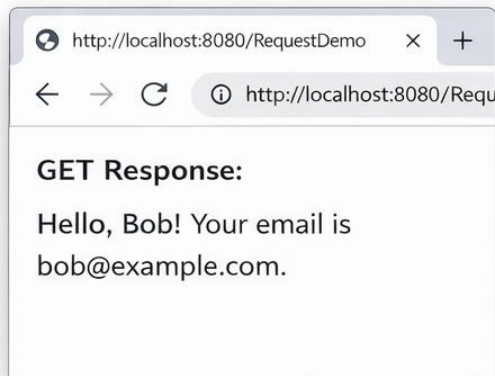

A screenshot of a web browser window. The address bar shows the URL `http://localhost:8080/RequestDemo`. The page title is "Enter Your Details". Below the title, there are two input fields: "Name:" with the value "Bob" and "Email:" with the value "bob@example.com". At the bottom, there are two buttons: "Submit with GET" (blue) and "Submit with POST" (green).

GET Request

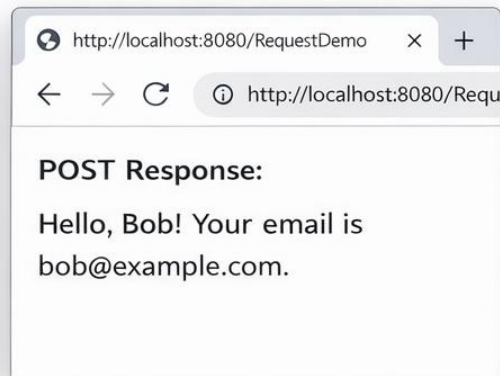

vs

POST Request

A screenshot of a web browser window showing the response to a GET request. The address bar shows the URL `http://localhost:8080/RequestDemo`. The page content is titled "GET Response:" and displays the text "Hello, Bob! Your email is bob@example.com."

URL has form data:
`/RequestDemo?name=Bob&email=bob%40example.com`

A screenshot of a web browser window showing the response to a POST request. The address bar shows the URL `http://localhost:8080/RequestDemo`. The page content is titled "POST Response:" and displays the text "Hello, Bob! Your email is bob@example.com."

Form data hidden in body
of the HTTP request
